## Samsung's Integrated Voice Processing Platform

**S**VMi-16E, Samsung's fully integrated voice processing platform offers more than traditional voice mail systems. This "in-skin" platform offers the features and functionality of voicemail and auto attendant while focusing on immediate, personalized, and unobstructed access to callers. SVMi-16E allows your company to increase productivity by efficiently managing your busy call traffic and effectively serving your business communication needs.

An expansion of our popular SVMi line, the SVMi-16E provides 16 ports and up to 1000 mailboxes. Specifically designed to integrate into Samsung's iDCS 500 system, the SVMi-16E provides multi-language support for 9 languages (English, Spanish, and French are standard). Fax-on-Demand, Network Mailboxes and LAN and Modem connections are just a few of the comprehensive set of features which make the SVMi-16E unlike any other voice processing platform in today's market.

Combining the SVMi-16E's features with the functionality of Samsung's iDCS product portfolio, Samsung offers feature rich business systems to propel your company into the future.

## Highlighted Voice Mail Features

**Answer Machine Emulation** Monitor while messages are being left in your voice mail box through the speaker of your keypad just like screening a call on your home answer machine.

**Broadcast** Authorized personal can broadcast a message to everyone in the system.

**Call Back** Press one key and automatically call back the person who left you the message.

**Date and Time Stamp** Each message received is date and time stamped upon arrival.

**Direct Messaging / Quick Memo** Easily leave a message for anyone without calling the extension first.

**External Notification** When you have messages in your mailbox, you are alerted at your cell phone, home phone or a pager.

**Individual Mailbox Greeting** Each mailbox has its own personalized greeting recorded in their voice.

**Message Scan** Easily scan your messages. The first few seconds of each message will be played, and then it will go to the next message.

**Message Fast Forward and Rewind** Easily skip through a message if you are looking for a specific piece of information.

**Message Forward With Append** Messages can be forwarded to other mailboxes in the system with introductory remarks.

**Message Pause** Pause the messages at any time while listening to your messages.

**Message Retrieve** Any sent message can be canceled before the recipient has received it.

**Message Skip** While listening to any message, you can quickly search for any message, and still save all the messages as new.

**Message Undelete** Retrieve messages that have been previously deleted that day. No more losing valuable messages by pressing the wrong button.

**Message Waiting Light Indication** An instant indication on your keypad tells you when you have new messages. Press one button and connect with your voice mail.

**Multiple Language Support** System and mailbox prompts can be individually set to play one of 9 languages.

**New or Old Message Selection** Access your mailbox and choose to listen to either new or old messages.

**Personal Mailbox Administration** Change settings for your mailbox any time you like, from any phone anywhere in the world.

## Selected System Features

**Alphabetic Directory (Multiple)** Callers who do not know your extension number but know your name may enter the first few letters of your name and then easily be transferred.

**Audiotex** Audiotex allows you to provide information only, without giving the option to record a message.

**Automatic After Hours Answering** The main greeting changes from the day to night greeting automatically.

**Caller ID Compatible** If you have caller ID, the SVMi-16E captures the caller ID and saves it with each message. Then you can call back the person leaving the message.

**Compound or Multiple Document Delivery** Any number of fax documents may be linked to form a single fax document.

**Incoming Call Overflow** You can answer any or all lines immediately or answer only the calls that your operator does not pick up.

**Keypad Display and Soft Key** Navigate through the SVMi-16E menus using the keypad display and the soft keys below the display to respond to prompts.

**Recordable System Prompts** Add or record selected prompts to suit your particular business.

**Synchronized Clock** Changing between day and night modes is always synchronized with the phone system.
